1. The drawings filed on 3/25/04 are accepted.
2. The following is an examiner's statement of reasons for allowance: the examiner found no teaching in the prior art that would render obvious the claimed bootstrap tandem navigation receiver system, and a navigation system including "a first navigation receiver having a first millisecond epoch timing signal, a second navigation receiver collocated with said first navigation receiver and having a second millisecond epoch timing signal, a second reference frequency signal", claim 1, lines 2-3, 5-13, "a first navigation receiver that includes coherent acquisition of a constellation of navigation satellites and includes carrier phase measurements, and further having a first millisecond epoch timing signal, a second navigation receiver collocated with said first navigation receiver and including non-coherent acquisition of the navigation data phase of each of said constellation of navigation satellites", claim 7, lines 2-5, 7-15, "a high-sensitivity navigation receiver able to acquire individual navigation satellites with non-coherent techniques that updates all twenty millisecond predetection interval (PDI) hypotheses for the bit transition time (BTT) of the navigation data phase of each of said individual navigation satellites with 20-millisecond coherent PDI's and determines the most likely BTT", claim 9, lines 6-13.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
